

October 27, 2020

Dear Producer,

You recently applied for CFAP 2.0 on your sales commodity crops and FSA could not provide an answer as to what was acceptable sales value to be included in the “raw” product value.

FSA has now been provided with direction that the following can be included in the sales value of the “raw” product:

Pots (not decorative)
Soil
Tags

Please contact your local FSA Office to make an appointment to amend your application if you did not include these items in your original total sales certification for 2019.

Sincerely,

Joel C. Johnson
State Executive Director
Michigan State Farm Service Agency
